

Delivery Service Management Solutions

Increase Sales with Online Ordering and Delivery Services

When you have an influx of online orders, your business needs to be prepared. Online, mobile ordering and delivery are the ultimate in customer conveniences. You need to get it right the first time to ensure customer retention. Unorganized delivery routes and zones lead to long waits, cold food upon arrival, and lost business. Don't waste restaurant time and money on drivers doubling back to redeliver orders.

Focus for delivery is designed for restaurants with high-volume delivery and takeout. Focus allows employees to review customer order history and duplicate standard orders. Delivery management features like routing and zoning guarantee that customer orders arrive hot, on time, every time. Focus offers online ordering integration with Uber Eats, GrubHub, Postmates, and more!
