

Café Management Solutions

Streamline Food and Drink Preparation and Expedite Customer Checkout

Cafés and coffee shops are hubs of activity from the early morning to the late afternoon. Guests expect their customized drinks to be made quickly and correctly so they can continue about their days. Bakery displays and coffee stations need to be well stocked to make it through the morning rush. This hectic environment requires a POS system that offers quick and easy order-entry, streamlined food and drink preparation, and lightning-fast transactions.

Focus offers a solution designed to handle coffee shop environments. Our intuitive touchscreen system allows employees to manage the counter and drive-thru with a single interface, streamlining order entry, food and drink preparation, and checkout.

Focus for coffee shops and cafes includes 250 unique screens that are capable of holding up to 150 buttons each, allowing for endless coffee combinations. These can be customized so frequently-ordered items are easily accessible. Empower your managers to keep a pulse on sales, inventory, marketing, labor costs and profit margins with Focus for cafés and coffee shops.
